

**WARANTEE FORM FOR
PV MOUNTING SYSTEMS**

DATE:20/02/2014

PV MOUNTING SYSTEMS

METALOUMIN S. A. is an aluminium extrusion industry, founded in 1969 and is specialized in the photovoltaic's field.

Our Aluminum Mounting Systems are statically certified by TÜV Hellas and have been designed according to Eurocodes 1 & 9.

The production of the mounting systems in our plant in Greece, is certified with EN ISO 9001 TÜV CERT Austria and EN ISO 14001 standards. The systems consist of INOX (stainless steel) accessories and offer 25 year warrantee for corrosion resistance of aluminium profiles installed in distance more than 3km from the sea front. If the installation lies in distance less than 3km from the sea, anodization of aluminum profiles is required so that the 25-year warrantee applies also.

The present warrantee includes replacement in whole or in part of the mounting system in case of a proved damage due to corrosion.

After the end of the warrantee, the period of warrantee cannot be extended.

There exist no other requirements apart from those already mentioned in the present warrantee form.

The present warrantee applies for METALOUMIN mounting systems that are bought and used in Europe.
